

Washington, DC – Today, Congressman Bruce Braley (D-IA) announced \$5 million for 17 transit systems throughout Iowa. The grant will go towards vehicle replacement projects, replacing older vehicles in the transit systems' fleet. Updating the vehicles will allow for more reliable service and increased ridership.

"This grant provides important funding to transit systems across Iowa," Braley said. "It is important that we continue to improve our public transportation systems, making them as efficient and reliable as possible."

The United States Department of Transportation provides these funds through the Federal Transit Administration.
